

DEEPADHARSHINI G

Java Backend Developer

✉ deepadharshinig07@gmail.com

📞 +91 8667384737

PROFESSIONAL SUMMARY

- Java Backend Developer with 2 years of experience specializing in Java 8 and Java 17, Spring Boot, Microservices, Spring Framework, Hibernate, RESTful APIs, MySQL, and PostgreSQL. Skilled in developing scalable web-based and distributed applications with a strong foundation in Object-Oriented Programming (OOP) principles.
- Proficient in the complete Software Development Life Cycle (SDLC), including requirements analysis, development, testing, deployment, and maintenance, with hands-on experience working in Agile (Scrum) methodologies.
- Experienced in production deployments, resolving Jenkins pipeline and build issues, and supporting application maintenance.
- Hands-on experience in writing Dockerfiles, building Docker images, and deploying containerized applications using Docker.
- Knowledge of deploying applications on Kubernetes clusters, including creating and managing deployment YAML files.
- Strong analytical, debugging, and problem-solving skills with experience in maintaining and enhancing enterprise backend applications.

SKILLS

Languages	Java 8, Java 17	Frameworks	Spring Boot, Microservices, Spring Framework, Hibernate
Databases	PostgreSQL, MySQL	Web Servers	Tomcat, Nginx
Messaging	Apache Kafka	CI/CD & Build	Jenkins, GitHub Actions & Maven
Containerization	Docker, Kubernetes	Cloud	AWS, Azure
Load Balancing	HAProxy, Keepalived	Testing & Tools	Postman, JMeter, JUnit
OS	Linux, Windows	Methodologies	Agile (Scrum), SDLC

WORK EXPERIENCE

Accenture

Bangalore, India

March 2024 – February 2026

Project 1: Automotive Workshop Management System

Developed a comprehensive automotive workshop management system to streamline service center operations, including vehicle service booking, job card management, technician assignment, spare parts tracking, and billing. The system improved workshop efficiency by digitizing manual processes and providing real-time visibility into service progress.

Technologies: Java 17, Spring Boot, Microservices, Hibernate, MySQL, Apache Kafka, Docker, Kubernetes, AWS (EC2, S3), REST APIs

Roles & Responsibilities:

- Developed RESTful APIs for service appointment booking, job card creation, and workshop operations.
- Designed and implemented the Job Card module to record customer complaints, inspection details, service tasks, and technician allocation.
- Built end-to-end workshop workflow: Vehicle Check-in → Inspection → Job Card → Service Execution → Quality Check → Billing → Delivery.
- Implemented technician assignment logic based on skillset and availability, and integrated spare parts inventory tracking.
- Used Kafka for asynchronous communication between workshop, inventory, and billing services.
- Worked on the database schema for vehicles, customers, job cards, service history, and invoices, ensuring efficient data storage and retrieval.
- Containerized applications using Docker and deployed on Kubernetes for scalability and reliability.

Project 2: Logistics & Shipment Tracking System

Developed a scalable logistics and shipment tracking platform to monitor and manage shipments in real-time across multiple regions. The system enabled end-to-end visibility of shipments, improved delivery efficiency, and provided real-time notifications to customers and internal stakeholders.

Technologies: Java 8, Spring Boot, Microservices, Hibernate, PostgreSQL, Apache Kafka, Docker, Kubernetes, AWS (EC2, S3), REST APIs

Roles & Responsibilities:

- Developed RESTful APIs for shipment creation, tracking, and delivery status updates.
- Implemented real-time shipment tracking using Apache Kafka for asynchronous location and status updates.
- Developed microservices for order management, shipment processing, and notification services (Email/SMS).
- Developed and optimized PostgreSQL database tables, queries, indexes, and relationships for shipment, order, and customer data.
- Implemented fault-tolerant message processing using Kafka with retry mechanisms and dead-letter queues.
- Containerized applications using Docker and deployed them on Kubernetes clusters for scalable and reliable deployments.

EDUCATION

B.Sc. Computer Science (Applied Science)

June 2020 – May 2023

Kongu Engineering College, Erode | CGPA: 8.0 / 10.0

CERTIFICATIONS

Certification	Code	Issuer	Status
Microsoft Azure Fundamentals	AZ-900	Microsoft	Completed
Microsoft Azure Administrator	AZ-104	Microsoft	Completed
Microsoft Azure DevOps Engineer	AZ-400	Microsoft	Completed
Microsoft Azure AI Fundamentals	AI-900	Microsoft	Completed

DECLARATION

I hereby declare that the above information given by me is true to the best of my knowledge and belief.
