

DEEPADHARSHINI G

Java Backend Developer

+91 8667384737 | deepadharshinig07@gmail.com | linkedin.com/in/deepadharshinig07

PROFESSIONAL SUMMARY

Java Backend Developer with 2 years of experience specializing in Java 8/17, Spring Boot, Spring Framework, Microservices, Hibernate, RESTful APIs, MySQL, and PostgreSQL, with strong knowledge of Object-Oriented Programming (OOP) and scalable backend application development. Proficient in the Software Development Life Cycle (SDLC) — requirements analysis, development, testing, deployment, and maintenance — with hands-on experience in Agile (Scrum) methodologies. Experienced in production deployments, application maintenance, Jenkins CI/CD pipelines, build issue resolution, and debugging for enterprise backend applications. Hands-on with Docker containerization and Kubernetes (K8s) deployment, including writing Dockerfiles, building Docker images, and managing Kubernetes YAML manifests.

CORE TECHNICAL SKILLS

Languages: Java 8, Java 17

Frameworks: Spring Boot, Spring Framework, Microservices, Hibernate

Databases: PostgreSQL, MySQL

Web / Application Servers: Tomcat, Nginx

Messaging: Apache Kafka

CI/CD & Build Tools: Jenkins, GitHub Actions, Maven

Containerization & Orchestration: Docker, Kubernetes (K8s)

Cloud Platforms: AWS (EC2, S3), Azure

Load Balancing: HAProxy, Keepalived

Testing & Tools: Postman, JMeter, JUnit

Operating Systems: Linux, Windows

Methodologies: Agile (Scrum), SDLC

PROFESSIONAL EXPERIENCE

Java Backend Developer, Accenture

Mar 2024 – Feb 2026

Project 1: Automotive Workshop Management System

Technologies: Java 17, Spring Boot, Microservices, Hibernate, MySQL, Apache Kafka, Docker, Kubernetes, AWS (EC2, S3), REST APIs

- Developed RESTful APIs for service appointment booking, job card creation, and workshop operations, supporting end-to-end digitization of manual service-center processes.
- Designed and implemented the Job Card module to record customer complaints, inspection details, service tasks, and technician allocation.
- Built the end-to-end workshop workflow — Vehicle Check-in, Inspection, Job Card, Service Execution, Quality Check, Billing, Delivery — improving real-time visibility into service progress.
- Implemented technician assignment logic based on skillset and availability, and integrated spare parts inventory tracking into the workflow.

- Used Apache Kafka for asynchronous communication between workshop, inventory, and billing services, decoupling service dependencies.
- Designed the database schema for vehicles, customers, job cards, service history, and invoices, ensuring efficient data storage and retrieval.
- Containerized applications using Docker and deployed on Kubernetes (EKS) for scalability and reliability.

Project 2: Logistics & Shipment Tracking System

Technologies: Java 8, Spring Boot, Microservices, Hibernate, PostgreSQL, Apache Kafka, Docker, Kubernetes, AWS (EC2, S3), REST APIs

- Developed RESTful APIs for shipment creation, tracking, and delivery status updates across a multi-region logistics platform.
- Implemented real-time shipment tracking using Apache Kafka for asynchronous location and status updates, improving delivery visibility for customers and internal stakeholders.
- Developed microservices for order management, shipment processing, and notification services (Email/SMS).
- Optimized PostgreSQL database tables, queries, indexes, and relationships for shipment, order, and customer data, improving query performance.
- Implemented fault-tolerant Kafka message processing with retry mechanisms and dead-letter queues (DLQ), reducing message loss during service failures.
- Containerized applications using Docker and deployed them on Kubernetes clusters for scalable, reliable production deployments.

EDUCATION

B.Sc. Computer Science (Applied Science) - Kongu Engineering College, Erode
CGPA: 8.0

Jun 2020 – May 2023

CERTIFICATIONS

- Microsoft Certified: Azure DevOps Engineer Expert (**AZ-400**)
- Microsoft Certified: Azure Administrator Associate (**AZ-104**)
- Microsoft Certified: Azure Fundamentals (**AZ-900**)
- Microsoft Certified: Azure AI Fundamentals (**AI-900**)
